Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: the closest prior art reference of record is the patent to Goebel, cited in the previous action. However, the reference fails to teach or suggest the feature of adding direction to interference edges of a register interference graph wherein upon determining that a variable associated with a node was live when another variable associated with another node was defined or used, the first node is a primary node (see claims 1, 17 and 27). Goebel also does not teach or suggest the feature of building a register interference graph by defining an interference edge between a first node and a second node wherein upon a determination that a first variable associated with the first node is live when a second variable associated with the second node is defined or used, the first node is a primary node (see claims 11 and 14).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Chavis whose telephone number is (571) 272-3720. The examiner can normally be reached on M-Th, 8:30am-5:00pm, EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kakali Chaki can be reached on (571) 272-3719. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
